

I can trace and cut!

I can trace and cut!

Is a three-level series that provides preschool learners with fun activities to develop fine motor skills. The activities are designed to establish students' initial neuro-motor skills in relation to: posture and positioning, eye movements, the correct way to hold an implement, the coordination of force and pressure.

I can do math!

I can do math!

Is a three-level series designed to introduce preschool learners to the world of mathematics. Guided math studies at the preschool stage seek to reinforce and expand learners' acquisition, allowing them to reach a certain level of aptitude, understanding and ability before moving on to the development of more complex concepts.
